PROJECTS

Freelance Developer   ***Private Repo***   **Current**

- Fully redesigned and launched an SSL certified and responsive website for a client's pool company.
- Implemented one-click application form for employees as well as secure online payment through PayPal in order to save time in recruitment and increase sales figures.
- Designed and built wedding venue site using WordPress ahead of schedule, and with a tight deadline.
- Created mockups and wireframes and translated them into Front End code.

World of Flags   **Github, Live**   **Jan 2019**

- Developed schema for the backend server of a geographical quiz application built with Node.
- Utilized B-Crypt to encrypt tokens and ensure user information remains private.
- Scraped data from the Jeopardy API with the help of Nightmare.js to construct questions and clues.
- Finished the backend server ahead of schedule and joined frontend team to implement a registration and login management screen through Redux-Thunks against a RESTful API.
- Decreased code review time through automated testing with TravisCI.

Next-Flix   **Github, Live**   **Dec 2018**

- Recreated Netflix's beautiful UI using the MovieDB API, React, Redux, and React Router.
- Incorporated IFrame in order to play movie trailers on mouse hover, and display a random background trailer that refreshes every 2 minutes to encapsulate the feel of Netflix's website.
- Designed backend server through Node.js, Express, and Knex hosted on Heroku to store user login information as well as favorite movies.

Get Educated On Education   **Github**   **Nov 2018**

- Developed an application that would target a user's geo-location and display that states Congressmen.
- Allowed user to compare Congressmen based on an education parameter.
- Achieved 90%+ test coverage, using unit tests and snapshots through Enzyme and Jest.

PRIOR EXPERIENCE

Crew Leader   **Denver Country Club**   **March 2016 – May 2018**

- Organized and trained in-house staff to improve productivity through daily job boards.
- Utilized agronomy and topography knowledge to effectively administer fertilizer and pesticide applications.
- Honed natural leadership skills through managing crew of 20+ employees.

EDUCATION

Denver, CO   **Turing School of Software and Design**   **Jun 2018 – January 2019**

- Full-time intensive 7-month program at renowned programming school.

Fort Collins, CO   **Colorado State University**   **Sep 2009 – Dec 2013**

- BS in Turf Grass Management from Agricultural Program.

Languages and Technologies

- JavaScript; jQuery; Vue.js; WordPress; React; Router; Redux; Redux-Thunks; .NET; Node.js; PostgreSQL; Express; HTML; CSS (Grid, Flex, SASS)
- Visual Studios; Git; TDD; Data Structures & Algorithms; Agile Practices; OOP; RESTful services & API's; CI
